
EDUCATION**MS in Computer Science**

Binghamton University, Binghamton, NY

Aug 2017 – May 2019 (Expected)

GPA – 4.0

Relevant Coursework: Programming Languages, Programming Systems and Tools, Computer Architecture & Organization, Design Patterns, Design and Analysis of Algorithms, Operating System.**Bachelors of Engineering in Computer Engineering**

Atharva College of Engineering, Mumbai, India.

August 2008 - May 2012

First Class**Relevant Coursework:** Computer Architecture, Data Structure & Files, Database Management System, Analysis of Algorithm, Web Engineering, Object Oriented Software Engineering, System Security.

COMPUTER SKILLS**Languages & Technologies:** C#.NET, ASP.NET, ASP.NET MVC, Web Services, Web API, Window Service, WCF, Java, C, C++, SQL Server 2012, JQuery, JavaScript, HTML5, Ajax, CSS, Bootstrap, Entity Framework, Nhibernate**IDE:** Visual studio, Eclipse, Net beans, Code Blocks, Android studio**Operating Systems:** Win XP/7/8/10, Window Server 2008/2012

WORK EXPERIENCE**Senior Software Developer at Aurionpro Solutions Limited, Mumbai, India**

Sept 2012 to July 2017

- **Halfpenny Technologies**

Halfpenny Technologies, is dedicated to streamlining healthcare processes. I was involved in process of transferring patient information securely between different entities and in their respective formats. Also, responsible for maintaining different sites for displaying patient activities and its information. Technologies used: C#, ASP.net, JQuery, Ajax, MVC, Web Services, WCF, Web API, RavenDB, RabbitMQ, Entity Framework, SQL

- **Edeposit**

EDeposit is a full service online financial services company that provides innovative and secure online deposit, settlement, payment and other financial services for a variety of consumers, merchants and businesses. Involved in development of critical modules. I was involved in major development and also Handled the project alone for 1.5 years and performed the different roles as per requirement. Technologies used: C#, ASP.net, JQuery, Ajax, Spring, Web Services, WCF, NHibernate, SQL Server.

- **Aurionpro Payment Framework (APF)**

APF is a base framework for all payment projects and it is functionally rich platform to help accept and process ACH payments. I was involved in enhancement of framework and creating API to consume its services. Technologies used: C#, ASP.net, JQuery, WCF, Web API 2, NHibernate, Spring, SQL Server.

- **Vertafore**

The project was about integration of two CRM system and I was involved in creating integration test cases. Technologies used: C#.net, LINQ, MS-Test, XML.

- **Travel Desk**

Travel Desk was an internal application through which travel desk department can track and process the request of traveler. I was involved in requirement gathering, estimation, development, project documentation and handled a development team.

ACADEMIC PROJECTS

- **Real Estate Agent**

Developed window and web application using technologies VB.Net, ASP.Net, Web Service, MS SQL Server 2005 in which User/client can use the system to search the desired property depending on need. It includes functionalities like notification management, bidding, interested user information.

- **Recruitment Process System for the HR group for Company**

Some features of this system: creating vacancies, storing Applicants data, Interview process initiation, Scheduling Interviews, Storing Interview results for the applicant and finally Hiring of the applicant. And one person (HR/Interviewer) can send mail to another person. Also, applicant can create their profile and HR can review it. Technologies used: Java, MS SQL Server
